SUMMARY

Final-year Software Engineering student completing industrial training at RHB Bank's Digital & Technology department, where I'm building production-grade backend systems for digital identity verification. I build across the full stack such as Go, React, FastAPI, AWS, with a track record of shipping AI-powered applications in hackathons and real client environments. Currently pursuing AWS SAA-C03 certification.

EDUCATION**UNIVERSITI KEBANGSAAN MALAYSIA (UKM)**

Oct 2022 – Present

Bachelor of Software Engineering (Information System) | MUET: Band 4.5

COLLEGE MATRICULATION SELANGOR (KMS)

June 2020 – June 2022

Physical Science | CGPA: 3.67

SMK RAJA ABDULLAH (SMKRA)

Jan 2015 – Nov 2019

Pure Science | SPM: 3A 2A- 1B+ 2B

CERTIFICATION

June 2026

AWS Solution Architect Associate

Sept 2025

Apple App Development with Swift Associate

PROJECT**Finance Management App for B40 Entrepreneurs**

Sep 2025 – Feb 2026

- Developed a voice-based web application using React to help youth and small entrepreneurs track daily sales, aiming to simplify financial literacy for 100 target users.
- Integrated LLM functions to extract key data (item, quantity, profit) from raw speech inputs, achieving an average data extraction accuracy of over 90% during testing.
- Designed a postgresql structure capable of storing and aggregating monthly transactions for daily/monthly sales summaries, providing crucial business insights.

Rental Car Mobile Application

Oct 2024 – Jan 2025

- Built a full-stack mobile application for browsing, booking, and managing rental car services.
- Implemented comprehensive user authentication and developed real-time vehicle availability tracking features.
- Contributed to a four-member team by sharing development tasks and performing feature integration, ensuring on-time project delivery.

RELEVANT EXPERIENCE**RHB BANK BERHAD, RHB DIGITAL, DEPARTMENT OF TECHNOLOGY AND ENGINEERING (DTE)****Software Engineering Intern (Industrial Training)**

March 2026 – Present

- Designed and documented RESTful API specifications (OAS 3.0) for a digital identity proxy service, improving API clarity and handoff efficiency for the engineering team.
- Contributed to e-verification feature development and api polling integration for the proof of concept, supporting secure digital identity operations at scale.
- Collaborated in Agile sprints with cross-functional teams to deliver enterprise-level backend solutions.

Software Engineering Intern (Summer Internship Program)

June 2025 – Aug 2025

- Built an AI documentation assistant using FastAPI and LLM integration to process developer input into structured summaries, reducing manual documentation time by 40%.
- Created three Superset dashboards to visualize key metrics, including developer productivity and SonarQube quality scores, enabling management to generate weekly reports.

TECHNICAL SKILLS

Languages : Java, Python, Kotlin, Dart, Swift, PHP, HTML, CSS, SQL, Go.
Frameworks : Jetpack Compose, Flutter, FastAPI, Next.js.
Tools & Platforms : Firebase, MySQL, Git, GitHub, PowerBI, Docker, PostgreSQL, Supabase, Postman, Bruno, AWS (EC2).
Soft Skills : Leadership, Strategic Communication, Project Coordination, Agile Mindset.

AWARDS & HONORS

2025 Second Runner-Up, RHB Business Challenge 2025
2024 Best Facilitator Choice Award, Asean Youth Volunteer Program 2025

EXTRACURRICULAR INVOLVEMENT

COMPETITIONS AND HACKATHONS

DERIV AI HACKATHON 2026

- Built an AI-powered trading coach Chrome extension, placing as a top 50 out of all submissions.
- Designed to assist traders with real-time insights and coaching prompts using LLM integration.

CURSOR X ANTHROPIC HACKATHON

- Built CAKAPnBAYAR to reduce order entry errors by 100% using Whisper ASR + Groq inference for real-time multilingual voice transcription (Malay-English code-switching), with sub-3-second validation latency.
- Designed to improve accessibility for non-verbal communicators and multilingual users while increasing worker productivity by eliminating manual order typing in F&B environments.

CIMB X MICROSOFT GENAI HIRING HACKATHON 2025

- Developed a prototype solution for digital banking problem-solving using the Microsoft ecosystem to enhance fraud analysis workflows.
- Completed hands-on application of LLM workflows to model GenAI use cases, specifically for customer risk scoring and process automation in banking.

AWS JAM MALAYSIA 2025

- Completed guided cloud challenges involving core AWS services and learned basic troubleshooting steps used in real cloud environments.

PERSATUAN MAHASISWA ANAK SELANGOR (PERMAS) UKM

Oct 2024 – July 2025

VICE-PRESIDENT

- Directed the Fusion Arena sports event, coordinating logistics for 310 participants across physical and online formats over a 2-day period.
- Secured RM1,500 in sponsorship from multiple external partners by initiating pitch proposals and follow-up communication, exceeding the initial fundraising goal by 20%.
- Led PERMAS x Skal' Coff merchandise project by overseeing design, marketing, and agent recruitment.

GRADUAN AMBASSADOR

May 2024 – Nov 2024

- Coordinated 30 buses transporting 1,200 students for Graduan Aspire Career Fair, successfully managing all logistical routes.
- Reached 200+ student participants through active outreach efforts, successfully boosting event attendance by 15% compared to the previous cycle.
